LEAVING NO ONE BEHIND

With the support and commitment of our clients and referral sources, the DRCGA has grown so much over the past year. We wanted to return the favor, so we have moved forward with expansion and now have a beautiful new, larger facility located at 445 Huntington Road! Still centrally located behind Georgia Square Mall, our new facility allows us to grow our team to continue to meet the needs of individuals and families navigating divorce-related issues.

What hasn't changed is the affordability and accessibility of our comprehensive, integrated service model. We strive to provide the highest-quality of care based on the most effective best practices. These services can be provided in-person or virtually, covered by most insurance plans, including Medicaid CMOs. Our team of Master-level interns are available year-round to provide low cost, self-pay sessions. We look forward to what the future holds for DRCGA and we will be here for the expected and unexpected.

Courtney Fields McVey, LCSW

SUMMER 2020 FLASHBACK AND LOOKING FORWARD TO FALL

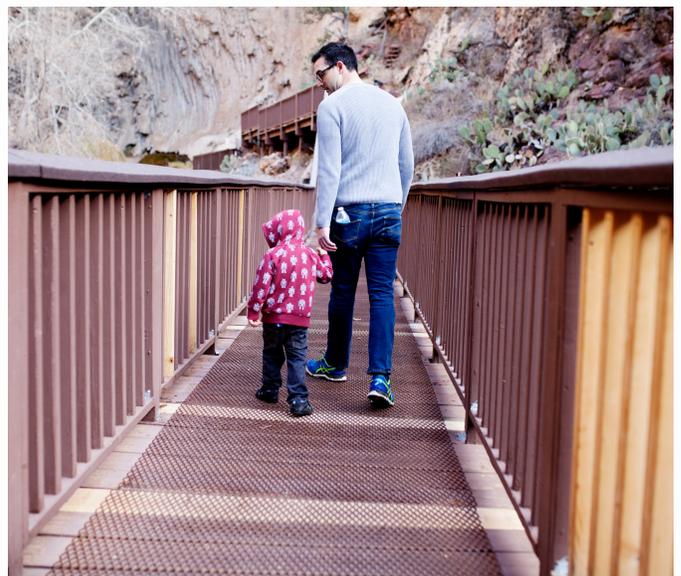

“

**"I MISS MY KIDS SO MUCH." -
NON-CUSTODIAL FATHER OF 2**

We hear this heart-breaking sentiment all too often, and not only from fathers. Parents navigating a high-conflict divorce without truly understanding their child's internal struggle can make many mistakes, many of which can look like parental alienation. But there is hope. Our **REUNIFICATION THERAPY** program is designed to work on addressing the barriers to a healthy parent-child relationship. Individual and joint sessions occur with all members of the family, with a focus on establishing boundaries, improving communication, and moving towards a fresh start in the parent-child relationship.

Do you feel like summer started at the end of March? You are not alone. Thanks to COVID_19, it's been a long one--with kids being at home, longer/hotter days, and much less to do with social distancing. Everything has felt "heavy" these past few months, and families and relationships have been hit hard. Many have been left in high-conflict limbo with the closures of the courts. But because of our **INTEGRATED SERVICE MODEL**, our Therapists and Parent Coordinators have worked closely with the Judicial system to mitigate the conflict during this transitional time. We've provided every family member with their own therapist, using a collaborative model that helps to reduce overall conflict. The family that seeks services together, works better together!
